Quiz Instructions

This experiment will require that you find a time to attend Stat 218 office hours, either on City campus (LPH 208) or East campus (Hardin 349).

The experiment should take about 20 minutes to complete, but you can feel free to ask questions of an instructor while you are there.

At the end of the experiment, you will be given a completion code that you will submit as the answer to this quiz. This code is unique to you. Your instructor will check this code against a list of all codes generated as part of this experiment. This code cannot be used to identify your individual responses to the questions in the experiment, but will validate that you participated.

Question 1

5 pts

Paste the response code you received after participating in the graphics experiment here
